

**LINVISIBILE**

**LINVISIBILE**

We are an Italian company which manufactures opening and closing systems unique in the world. We don't sell doors. We don't have a product catalogue. We listen to your desires and create the type of door you have dreamed of. Designed in the sizes that best suit your needs, using the colours, materials, and finishes you like, with the special touch you have conceived for your interior design project. We go to the work site, follow up the installation of the door and guarantee its perfect performance, because customer satisfaction – today as always – is the only result that counts.

Our doors are concealed.  
We aren't.

# More than meets the eye

**Linvisible synthesizes the concepts of aesthetics, technique and the ability to listen. The result of such combination are opening and closing systems for exclusive environments. Doors that are unique in the world, personalized and made to measure.**

Linvisible, is an Italian company founded in 1984, which in the new millennium has focused in the production of exclusive and personalized opening and closing systems.

The company's cornerstones are three:

- 100% Made in Italy production
- Product personalization
- New system of values

#### ITALIAN DNA

Born in the Emilia-Romagna region, in the border among the provinces of Ferrara, Bologna and Ravenna, Linvisible is the natural heir of a know-how that has evolved over more than two thousand years of history. Doing things well. And making them beautiful.

Here, artisans' hands and industrial technologies have always coexisted, and they have made this territory famous all over the world thanks to sports cars and motorcycles, precision mechanics, ceramics for architecture, packaging systems, biotechnologies, food...

Linvisible draws sustenance from the lifeblood of this territory so rich in creativity, and its project is the result of a far-sighted vision in 1994 when, after listening to the building site demands raised by different architects, the company was able to transform an artisanal carpentry system into an industrial process guaranteed over time.

Linvisible products are 100% made in Italy. Doors and systems developed with an almost obsessive care. Beautiful and well done. Pleasant and long-lasting. Pure luxury. Nothing less. Doors made to live well.

#### PERSONALIZED PRODUCT

Doors tailored to the customer's needs. Doors that open like as if in a dream.

In ancient times, they were called 'secret doors'. Kings, popes, aristocrats, monks and merchants had hidden doors made in the boiserie, in walls, in upholstery. Invisible doors. Doors developed to conceal from sight passages whose existence was to be unknown.

Linvisible has been the first-ever trademark to manufacture totally flush-to-wall doors and technical closures. The exclusive patented 'invisible system' eliminates posts, frames and exposed hinges making every movement and opening perfect. Turning each door into a unique piece. A declared or secret wonder.

Nowadays doors are a key element in an interior design project. Both in terms of aesthetics and for functional reasons. Linvisible fulfills the customer's desire and the designer's ideas manufacturing personalized doors for any environment, in any colours, materials and camouflages they wish.

Union and separation, privacy and silence, large openings and full height, comfort and surprise, luxury and sobriety, rigor and playfulness, minimalism and baroque, precision and mimicry.

#### EVERYTHING IS POSSIBLE

Linvisible is a made-to-measure project. As such, it's always moving and in constant evolution. Since 2015 a new era has begun, in the communication and visualization of the product along with extraordinary projects all over the world.

LINVISIBLE

LINVISIBLE

# Omnia Colosso

**Colosso is the most sensational Linvisibile's proposal. A stunning pivot door capable of reaching the exceptional height of 8 meters. The door, available in single leaf, opens and closes with a vertical pivot movement and is equipped with a high-performance pivot, which can be positioned at a minimum of 400 mm from panel edge. The height is supported by the great stability and strength of the panel and it's characterized by smooth and silent movements. Despite its sheer size, the panel is extremely handy and easy to handle without any effort. The base finish is aluminium, which can be treated to obtain finished effects such as metal and solid colour surfaces. The plates can be assembled by their direct combination or by using anodizable joints between them. Outside it is equipped with a fixed anodizable handlebar, in our color palette, of 2000 mm height, and by a flush-to-panel display that can be used as a touch screen or can be activated via mobile to unlock the multi-point lock. Inside, the door is equipped with Linvisibile's anodized lever handle.**

#### — TECHNICAL DETAILS

- Panel in aluminium of 90 mm thickness;
- Presence of a top and under door gasket;
- The panel edge is coated in the same finish as the surface;
- Possibility to apply different effects on the sides;
- The door is equipped with a frame to install in the wall and coated in the same finish as the panel.

#### — FINISHES

Painted aluminium

#### — DIMENSIONS

(CLEAR WIDTH, SINGLE LEAF)

- all widths from 1200 mm to 2000 mm
- all heights from 3500 mm to 8000 mm

Omnia  
COLOSSO

# Finishes

**Linvisible works hard on being trendsetters, we support originality and excellence and that's why we pride in partnering with suppliers who are the best in their craft. Creators of the highest quality materials and textures, which allow and ignite creative freedom. All these materials and some more, enrich our wide offer of finishes for Architects and Designers in search of unique spaces with authorial characteristics.**

# Anodizations

**The anodized aluminium has considerably higher performance and is suited to be customized through colouring or texturing. The anodizing treatment coats the aluminium with a protective oxide layer that not only gives it aesthetics properties but also protects against corrosion. Refined, elegant colours, in warm or cold shades according to preference, for unlimited combinations. Splendid colours, special nuances to customize any type of environment.**
